***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-7, drawn to a pressure-sensitive adhesive sheet.

Group II, claims 8-21, drawn to a method of making a pressure-sensitive adhesive sheet.

Group III, claim 22, drawn to a release liner.

Group IV, claims 23-27, drawn to a method of making a release liner.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: All the groups are directed to an article and a process useful in the general field of the pressure sensitive electrical tape. Group (I, II) has a special technical feature directed to through holes penetrating through the thickness of the adhesive tape not required for Groups III-IV. Group III has a special technical feature directed to the holes having an average diameter ranging from 0.1 to 2000 microns not required for Groups (I, II) and IV. Group IV has a special technical feature directed to a coating step not required for Groups (I,II) and III.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or

corresponding special technical features for the following reasons: Claim 1 is anticipated or obvious over Roberts (US 4,121,005). As the recited structure does not make a contribution over the prior art, unity of invention is lacking and restriction is appropriate.

A telephone call was made to David G. Posz on 02/15/2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai Vo whose telephone number is (571) 272-1485. The examiner can normally be reached on Monday through Thursday, from 9:00 to 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on (571) 272-3186. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
